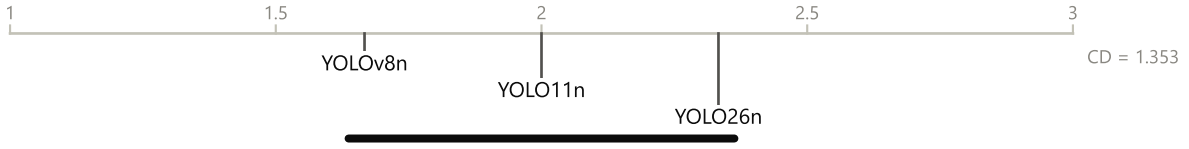
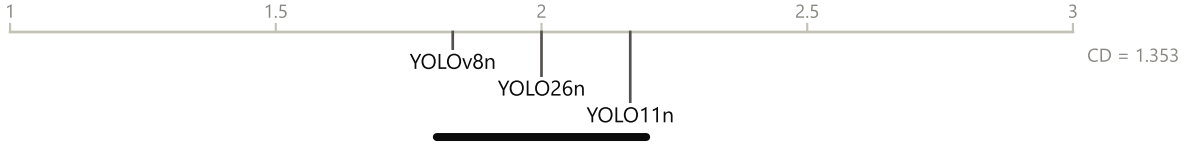
Critical-difference diagrams: models joined by a bar are not distinguishable

map50_in (accuracy, in-domain) — Friedman p = 0.0302 (separated)

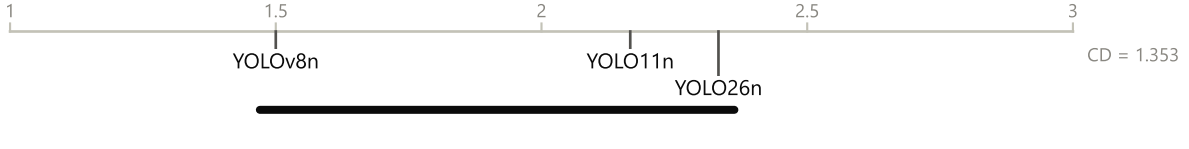
map50_cross (cross-dataset) — Friedman p = 0.5134 (no difference detected)



transfer_delta (in -> cross) — Friedman p = 0.8465 (no difference detected)



helmet_violation_recall — Friedman p = 0.3114 (no difference detected)



person_detection_rate — Friedman p = 0.1353 (no difference detected)
